

Edge Standard BG Integration

Screening Response Status Rules

This document will describe the rules that are in place for how to report statuses back in the HR-XML responses that the Edge system will return to the client/vendor system. These rules are the default generic rules, but can be customized per any client requests/specifications.

Document History:

Author	Date	Comment	Version

Individual Screening Statuses – these are used for each individual screening that is being reported back

- **Initial Statuses while “In Progress”**
<OrderStatus>InProgress</OrderStatus>
<ResultStatus>InProgress</ResultStatus>
- **Status if Screening requires “review” by client in WebScreen**
<OrderStatus>InProgress</OrderStatus>
<ResultStatus>Review</OrderStatus>
- **Final Status when Screening “Complete”**
<OrderStatus>Completed</OrderStatus>
<ResultStatus>Fail</ResultStatus> OR <ResultStatus>Pass</ResultStatus>

Overall Applicant Statuses – these are used when all the individual screenings are completed and the overall package for an applicant status is returned.

- **<OrderStatus>Completed</OrderStatus>** - always returned as overall status
- **<ResultStatus>** - see statuses and rules for use below
 - **Fail** – There was a failed screening for this applicant
 - **Pass** – There were no failed screenings.
