Edge Standard BG Integration

HR-XML – Final Request Sample

This document will serve as the foundation to describe the standard HR-XML response that the Edge system will return to client/vendor upon successful completion of a background check. This document should contain all XML elements that are to be sent back to properly describe the final status of the screenings.

Document History:

Author	Date	Comment	Version
Marc Giguere	09/01/11	Initial Document Creation	1.0
Marc Giguere	11/03/11	Added attributes to root tag for vendor authentication elements.	1.0

Comments – these are provided in orange and are informational in nature. It is not expected that these should be found in the actual XML data transmitted to Edge.

Required – anything found in red is considered a required element and WILL be included in the XML in order for the response to be properly processed and created.

Optional - these are "optional" elements that may be included, but are not required and/or used by Edge to process screenings for the applicant.

$value$ - this indicates a value that can be specified by vendor or Edge. For vendor values, this may to be any text/value that they would like to use in the XML to help them identify data elements that hold information they provide/etc.

```
<BackgroundReports account="$VendorSuppliedValue$" userId="$VendorSuppliedValue$" password="$VendorSuppliedValue$">

        <!-- Edge unique identifier that identifies this is a status report for Customer; designates our "Account Number" for this request  -->
        <ProviderReferenceId>
                <IdValue>$EdgeProvidedValue$</IdValue>
        </ProviderReferenceId>

        <BackgroundReportPackage type="status">

                <!-- Unique identifier that identifies Applicant being screened; will match the top level "ReferenceID" value found in the "Initial Request" sent to Edge  -->
                <ClientReferenceId>
                        <IdValue>$InitialRequestValue$</IdValue>
                </ClientReferenceId>

                <!-- Overall screening status summary; values provided here change based on status of the overall package and when appropriate any client specific rules. Rules to be included in "Screening Response Rules" document.  -->
                <ScreeningStatus>
                        <OrderStatus>Completed</OrderStatus>
```

```xml
                    <ResultStatus>Pass</ResultStatus>
                    <DateOrderReceived>01/04/2011</DateOrderReceived>
            </ScreeningStatus>

            <!-- Individual Status of each search in the package, thus will appear 1 to x times, once for each
            screening included in the package for this applicant. -->
            <Screenings>
                    <!-- Any types not natively supported by HRXML will preface name with "x:" -->
                    <Screening type="x:OFAC">
                            <!-- Edge unique identifier for this particular screening (BatchID|ScreeningID) -->
                             <ProviderReferenceId>
                                    <IdValue>$EdgeProvidedValue$|$EdgeProvidedValue$</IdValue
                             </ProviderReferenceId>

                            <!-- Unique identifier that identifies Applicant being screened; will match the top level
                            "ReferenceID" value found in the "Initial Request" sent to Edge -->
                            <ClientReferenceId>
                                    <IdValue>$InitialRequestValue$</IdValue>
                            </ClientReferenceId>

                            <!-- Statuses shown here are for the initial response, final response will include
                            different statuses outlined in "Screening Response Rules" sample document -->
                            <ScreeningStatus>
                                    <OrderStatus>Completed</OrderStatus>
                                    <ResultStatus>Pass</ResultStatus>
                                    <DateOrderReceived>01/04/2011</DateOrderReceived>
                            </ScreeningStatus>

                            <!-- If this screening was reviewed in WebScreen and comments were added by the
                            end clients, then those comments will be include here within this element. -->
